## CAREER OBJECTIVE

---

Passionate Frontend Web Developer with a solid foundation in the MERN stack and hands-on experience in building dynamic, responsive, and user-friendly web applications. Seeking a challenging role in a growth-oriented company where I can apply my skills, continue learning, and contribute to impactful and innovative projects.

## SKILL

---

- **Frontend:** React.js, Next.js, TailwindCSS, JavaScript, Typescript,HTML, CSS, DOM.
- **Backend:** Express JS, MongoDB,Mongoosejs ,Firebase .
- **Tools:** Git, Chrome Dev-tool, VS Code, GitHub.
- **Soft Skills:**Quick learner, Active listening, Teamwork

## PROJECT

---

### Agri-Tech — *Team Project*

[Live site](#) | [Github](#)

A full-stack agriculture platform that empowers farmers to sell products directly to customers, manage their inventory, access helpful resources, and connect with other farmers through a forum. AI-powered pest detection supports smarter farming.

#### Features:

- Farmers can sell their products (e.g., crops,vegetables, tools) directly to customers.
- A comprehensive tool to help farmers manage their products and track sales.
- A forum for farmers to discuss agricultural topics, share knowledge, and collaborate.
- Farmers can explore various resources, tips, and guidelines to improve their farming practices.

**My Contribution:**Built the complete authentication system and all API routes. Designed and developed the entire marketplace, including the product listing, details page, and farmer dashboard. Integrated an AI-powered pest detection feature to assist farmers and improve user experience.

**Technology:**HTML, Tailwind CSS, Next.js, Node.js, Express.js, MongoDB, Typescript, JSON Web Token.

### Asset-Panda

[Live site](#) | [Client](#) | [Server](#)

This is an asset management system for tracking, organizing, and managing assets efficiently.

#### Features:

- Track company assets, monitor status and location, manage returns, and export records as PDFs.
- Employees can request assets; HR/Admins can approve, reject, or track request history.
- Powerful admin dashboard with search, filters, and pagination for efficient asset management.

**Technology:**HTML, Tailwind CSS, React.js, Node.js, Express.js, MongoDB, Firebase, JSON Web Token.

### Carola

[Live site](#) | [Client](#) | [Server](#)

Carola is an intuitive car rental application that allows users to easily browse, book, and manage rentals.

#### Features:

- Users can book, view, modify, or cancel car bookings seamlessly.
- Authenticated users can add, edit, or delete car listings with details like model, price, and availability.
- Advanced search with filters by model, brand, location, and sorting by price or date added.

**Technology:**HTML, Tailwind CSS, React.js, Node.js, Express.js, MongoDB, Firebase, JSON Web Token.

## EDUCATION

---

**B.A. (Hons) in Islamic History & Culture**  
**National University, Bangladesh**

**Session:** 2022 – Present (3rd Year Running)

## LANGUAGE

---

**Bangla:** Native, **English:** Comfortable, **Hindi:** Fluent
